FOR THE PUBLICATION OF
SCIENTIFIC WORK ON HORTICULTURE

Editors

C. A. WOOD
M. R. SAMPFORD
C. E. TAYLOR

VOLUME 7
1967

OLIVER & BOYD
EDINBURGH AND LONDON

CONTENTS

Number 1. May 1967

Page

Tomato transplant growth, production and uniformity, in relation to sources and levels of nitrogen, by C. A. Jaworski and D. J. Morton . . . 1

Promotion of strawberry fruit development by treatment with growth regulating substances, by P. A. Thompson 13

Vegetative growth responses of strawberry plants to differing photoperiods, by James G. Gosselink and Carter R. Smith 24

Experiments on controlling bulb scale mite of narcissus, *Steneotarsonemus laticeps* Halbt., by A. L. Winfield 34

Effect of planting date on seven cultivars of early summer cauliflower, by W. Heydecker and M. A. Nichols 44

Effects of mist and basal temperature on the regeneration of *Saintpaulia ionantha* Wendl. from leaf cuttings, by Margaret A. Scott and Margaret E. Marston 50

Translocation in tomato: the distribution of the products of photosynthesis of the leaves of a tomato plant during the phase of fruit production, by Aziz A. Khan and G. R. Sagar 61

A study on some rootstocks for apple trees in Poland, by A. Czynczyk and S. A. Pieniazek 70

Notes and Comments:

Complementary 'glossy' genes in brussels sprouts, and their application to the production of F_1 cultivars, by W. Greta Priestley . . 74

Studies on photoperiodism in carnations: an application to commercial flower production, by G. P. Harris 76

Reviews 78

Number 2. November 1967

Effects of pre- and post-harvest applications of 6-furfurylaminopurine and of N6-benzyladenine on physiological and chemical changes in lettuce (*Lactuca sativa* L.), by Hussein I. El-Mansy, D. K. Salunkhe, R. L. Hurst and David R. Walker 81

Effects of storage and nutrition on tomato transplant quality, survival and fruit yield, by C. A. Jaworski, R. E. Webb and D. J. Morton . . . 90

Inflorescence initiation in the strawberry. II. Some effects of date and severity of post-harvest defoliation, by D. T. Mason 97

Correlation studies in asparagus in relation to cumulative season yield, by D. P. Coyne 105

The incidence of scion-rooting of apple cultivars planted at different soil depths, by R. F. Carlson 113

Observations on some instances of partial sterility in red raspberry cultivars, by D. L. Jennings 116

Muskmelon micrografts, by Robert E. Foster 123

Changes in the composition of 'Concord' grapes during maturation and ripening, by R. V. Lott 126

Inflorescence initiation in the strawberry. III. Some effects of cloching during induction, by D. T. Mason 135

Notes and Comments:

A note on a plant density and fertilizer experiment with onions in New Zealand, by M. A. Nichols 144

Vigour of germination *in vitro* as an indicator of field emergence ability in peas, by D. A. Perry 148

Response of *Phaseolus vulgaris* seeds of high and low 'vigour' to seedbed conditions, by Walter Heydecker 151

Reviews 155

Index of Subjects 159

Index of Authors 160
